

AMENDMENT TO THE CLAIMS

The following claim listing replaces all prior listings and versions of the claims:

LISTING OF CLAIMS

1. (Currently Amended) A fuel tank cover body comprising:
a cover for closing the opening of a fuel tank;
a liquid level detection unit stored in said fuel tank; and
a fixing portion disposed in said cover for fixing the liquid level detection unit,
characterized in that said cover and said fixing portion are integrally formed of a resin,
and said fixing portion comprises two plate portions and connecting portions connecting
said two plate portions, said two plate portions and said connecting portions forming
tubular members.

2-3. (Cancelled)

4. (Currently Amended) ~~[[A]] The~~ fuel tank cover body as set forth in claim 1,
characterized in that said ~~fixing portion is formed into a tubular~~ members have member
having a rectangular sectional shape, ~~in which the connecting portion for connecting the~~
~~walls of the longer sides of said tubular member is disposed.~~

5. (Currently Amended) ~~[[A]] The~~ fuel tank cover body as set forth in claim 1,
characterized in that ~~[[the]]~~ a center point of said cover is located in such a projected
portion of said fixing portion, in which said liquid level detection unit and said fixing

portion are assembled, as is projected in ~~[[the]]~~ a direction normal to ~~[[the]]~~ a plate face of said cover.

6. (Currently Amended) ~~[[A]]~~ The fuel tank cover body as set forth in claim 1, characterized by further comprising:

guided portions disposed in said liquid level detection unit and extending in the assembling direction to said fixing portion;

guide portions disposed in said fixing portion for guiding said guided portions;
and

protruding walls disposed at ~~[[the]]~~ connecting portions of said guide portions for connecting said guide portions, to contact with said liquid level detection unit and extending ~~to extend~~ in the same direction as said assembling direction.

7. (Currently Amended) ~~[[A]]~~ The fuel tank cover body as set forth in claim 1, characterized by further comprising:

guided portions disposed in said liquid level detection unit and extending in the assembling direction to said fixing portion;

guide portions disposed in said fixing portion for guiding said guided portions;
and

protruding walls disposed at connecting portions of said guided portions in said liquid level detection unit for contacting with ~~connecting portions to connect~~ said guide portions and-~~[[for]]~~ extending in the same direction as said assembling direction.
